

# 2017 Equine Prohibited Substances List

- Prohibited Substances include any other substance with a similar chemical structure or similar biological effect(s).
- Prohibited Substances that are identified as Specified Substances in the List below should not in any way be considered less important or less dangerous than other Prohibited Substances. Rather, they are simply substances which are more likely to have been ingested by Horses for a purpose other than the enhancement of sport performance, for example, through a contaminated food substance.

| <b>LISTED AS</b> | <b>SUBSTANCE</b>                         | <b>ACTIVITY</b>                                    |
|------------------|--|--|
| CONTROLLED       | 17-Alpha-Hydroxy Progesterone<br>FEMALES | Hormone  |
| BANNED           | 17-Alpha-Hydroxy Progesterone<br>MALES   | Anabolic   |
| BANNED           | Acebutolol                               | Beta blocker                                       |
| BANNED           | Acefylline                               | Bronchodilator                                     |
| BANNED           | Acemetacin                               | Non-steroidal anti-inflammatory<br>drug            |
| BANNED           | Acenocoumarol                            | Anticoagulant                                      |
| CONTROLLED       | Acepromazine                             | Sedative   |
| BANNED           | Acetanilid                               | Analgesic/antipyretic                              |
| CONTROLLED       | Acetazolamide                            | Carbonic Anhydrase Inhibitor                       |
| BANNED           | Acetohexamide                            | Pancreatic stimulant                               |
| BANNED           | Acetaminophen (Paracetamol)              | Analgesic  |
| BANNED           | Acetophenazine                           | Antipsychotic                                      |
| BANNED           | Acetophenetidin (Phenacetin)             | Analgesic  |
| BANNED           | Acetylmorphine                           | Narcotic   |
| BANNED           | Adinazolam                               | Anxiolytic   |
| BANNED           | Adiphenine                               | Antispasmodic                                      |
| BANNED           | Adrafinil                                | Stimulant  |
| CONTROLLED       | Adrenaline                               | Stimulant  |
| BANNED           | Adrenochrome                             | Haemostatic  |
| CONTROLLED       | Adrenocorticotrophic hormone<br>(ACTH)   | Hormone  |
| BANNED           | Aformoterol                              | Bronchodilator                                     |
| BANNED           | AICAR                                    | Anabolic   |
| CONTROLLED       | Albuterol (Salbutamol)                   | Bronchodilator                                     |
| BANNED           | Alclofenac                               | Non-steroidal anti-inflammatory<br>drug            |
| BANNED           | Alcuronium                               | Muscle relaxant                                    |
| BANNED           | Aldosterone                              | Hormone  |
| BANNED           | Alfentanil                               | Narcotic   |
| BANNED           | Allopurinol                              | Xanthine oxidase inhibitor<br>(antihyperuricaemia) |
| BANNED           | Almotriptan                              | 5-hydroxytryptamine agonist<br>(antimigraine)      |
| BANNED           | Alphadolone acetate                      | Neurosteroid                                       |
| BANNED           | Alphaprodine                             | Opioid analgesic                                   |

# 2017 Equine Prohibited Substances List

- Prohibited Substances include any other substance with a similar chemical structure or similar biological effect(s).
- Prohibited Substances that are identified as Specified Substances in the List below should not in any way be considered less important or less dangerous than other Prohibited Substances. Rather, they are simply substances which are more likely to have been ingested by Horses for a purpose other than the enhancement of sport performance, for example, through a contaminated food substance.

|            |                                     |                                 |
|------------|-------------------------------------|---------------------------------|
| BANNED     | Alpidem                             | Anxiolytic                      |
| BANNED     | Alprazolam                          | Anxiolytic                      |
| BANNED     | Alprenolol                          | Beta blocker                    |
| BANNED     | Althesin                            | IV anaesthetic                  |
| BANNED     | Althiazide                          | Diuretic                        |
| CONTROLLED | Altrenogest (in males and geldings) | Oestrus suppression             |
| BANNED     | Alverine                            | Antispasmodic                   |
| CONTROLLED | Amantadine                          | Dopaminergic                    |
| BANNED     | Ambenonium                          | Cholinesterase inhibition       |
| CONTROLLED | Ambroxol                            | Mucolytic                       |
| BANNED     | Ambucetamide                        | Antispasmodic                   |
| CONTROLLED | Amcinonide                          | Corticosteroid                  |
| BANNED     | Amethocaine                         | Local anaesthetic               |
| BANNED     | Amfepramone                         | Stimulant                       |
| BANNED     | Amfetaminil                         | Stimulant                       |
| BANNED     | Amidephrine                         | Vasoconstrictor                 |
| BANNED     | Amiloride                           | Diuretic                        |
| BANNED     | Amineptine                          | Tricyclic antidepressant        |
| CONTROLLED | Aminocaproic acid                   | Haemostatic (anti-fibrinolytic) |
| BANNED     | Aminoglutehthamide                  | Aromatase inhibitor             |
| BANNED     | Aminoheptane                        | Vasopressor                     |
| BANNED     | Aminomethylbenzoic acid             | Anti-fibrinolytic               |
| CONTROLLED | Aminophylline                       | Bronchodilator                  |
| BANNED     | Aminopicoline                       | Nitric oxide synthase inhibitor |
| BANNED     | Aminopromazine                      | Antispasmodic                   |
| BANNED     | Aminopterin                         | Immunosuppressant               |
| CONTROLLED | Aminorex                            | Parasympathomimetic             |
| BANNED     | Amiodarone                          | Anti-arrhythmic                 |
| BANNED     | Amiphenazole                        | Stimulant                       |
| BANNED     | Amisometradine                      | Diuretic                        |
| BANNED     | Amisulpride                         | Antipsychotic                   |
| BANNED     | Amitriptylline                      | Tricyclic antidepressant        |
| BANNED     | Amlodipine                          | Antihypertensive                |
| BANNED     | Ammonium Chloride (injection)       | Acidifying agent                |
| BANNED     | Ammonium Sulphate                   | Nerve-blocking agent            |
| BANNED     | Ammonium Sulphide                   | Nerve-blocking agent            |
| BANNED     | Amobarbital                         | Sedative                        |
| BANNED     | Amodiaquine                         | Antimalarial                    |

# 2017 Equine Prohibited Substances List

- Prohibited Substances include any other substance with a similar chemical structure or similar biological effect(s).
- Prohibited Substances that are identified as Specified Substances in the List below should not in any way be considered less important or less dangerous than other Prohibited Substances. Rather, they are simply substances which are more likely to have been ingested by Horses for a purpose other than the enhancement of sport performance, for example, through a contaminated food substance.

|            |   |  |
|------------|---|--|
| BANNED     | Minoxidil                               | Vasodilator  |
| BANNED     | Mirtazepine                             | Antidepressant                                     |
| BANNED     | Mivacurium                              | Muscle relaxant                                    |
| BANNED     | Modafanil                               | Stimulant  |
| CONTROLLED | Moexipril                               | Angiotensin-converting enzyme inhibitor            |
| BANNED     | Mofebutazone                            | Non-steroidal anti-inflammatory drug               |
| BANNED     | Molindone                               | Antipsychotic                                      |
| BANNED     | Mometasone                              | Corticosteroid                                     |
| BANNED     | Montelukast                             | Leucotriene receptor antagonist - asthma treatment |
| BANNED     | Moperone                                | Antipsychotic                                      |

# 2017 Equine Prohibited Substances List

- Prohibited Substances include any other substance with a similar chemical structure or similar biological effect(s).
- Prohibited Substances that are identified as Specified Substances in the List below should not in any way be considered less important or less dangerous than other Prohibited Substances. Rather, they are simply substances which are more likely to have been ingested by Horses for a purpose other than the enhancement of sport performance, for example, through a contaminated food substance.

|            |   |   |
|------------|---|---|
| BANNED     | Paramethadione                                  | Anabolic                                |
